Data+

Enhance Your Research

Data+ is a **medical research data management solution** that enables the efficient collection, accumulation and use of data by focusing on: **data enrichment, third party engagement, time-saving tools and simplicity.**

HIPAA COMPLIANT

CERTIFIED ISO 9001:2008 COMPANY

Information Security Management System ISO 27001 Certified

Super Simple, Flexible Design

Do you spend an excessive amount of time creating forms and questionnaires? Is IT on your speed dial? Using Drag & Drop and WYSIWYG technology, Data+ empowers you to build forms (eCRF's) that match your specific research and workflow with complete flexibility, and includes tools that ensure workflow logic. Add to this powerful data integrity and consistency tools.

Rapid Data Capture

data entry, accumulation and validation slowing up your research? With optional keyboard-only use, real-time data validation and unique data enrichment tools, you could speed up data collection by up to 75%. Add to that an automated alert system to prevent sharing of identifying health information.

Sophisticated Management Tools

Looking to enrich your patient engagement? With Data+ you can perform sophisticated queries; create customized and personalized reports with dynamic data fields showing cross-research statistics, patient progress and scores; and export data to SPSS or to other statistical tools for further analysis
