

A Complete Solution For Your Registry

Data+ is a fully compliant and customizable platform for health and life-science applications.

The Patient Registry Application covers your registry from end-to-end - collect and manage your data, prepare it for analysis, follow-up on patients and plan your workflows.

Replace your spreadsheets with an advanced tool that enables you to perform real-time data validations, filter your data using natural language and produce precise reports and insights.

Build your database with an intuitive drag-&-drop visual editor

The Valve-in-Valve International Data (VIVID) Registry collects information on transcatheter heart valve replacement procedures and failures from more than **170 sites** worldwide. With over **260 collaborators** using the Data+ Patient Registry App, VIVID Registry has compiled close to **300,000 data-points** and saved countless of hours on data entry and error prevention.
